

I Am The Sea\*

A Transit of Power  
A collection of (e-)'s  
From all ends of the Earth  
A collection of seas

On contact they flow  
with polarized tides  
On a sea floor of charges  
With a bottom, no sides

Fighting with gravity  
and strong and weak forces  
Are electrostatic  
From those physics courses

No travellers, no winds  
yet the sea is not calm  
all commit to the cause  
in a metallic bond.

Russell w. Burgess
