

## THE ELEMENTS

by Candace Leblanc

There once was a man named Charles who came from a very wealthy family, who lived in Germanium(Ge) and he had a top hat that had Mercury(Hg) on it to make it shiny.

Eventually, because of the mercury he got open sores on his head , his family tried to cure it with some Iodine(I) but he got worse and went crazy and started talking about going to Uranium(U), Neptunium(Np) and Plutonium (Pu) .

So they used Lithium(Li) to try to make it better but that did not work; so they sold all of his Gold(Au) and Silver(Ag) to try to buy an Chromium(Cr) to take him to a hospital in Francium(Fr).

With no luck there, they headed to Polonium(Po), but there the nurses tried to kill him .

After that they headed to Scandium(Sc) they were driving along the Rhodium(Rh) when they crashed and died and they were buried in Iron(Fe) Caskets.
