

Halloween Night

Tracy Kong: Element Story

On Halloween night everyone went trick or treating, so I decided I would dress in a real uranium(u) coat.

What a radium idea!

I went to a gold (Au) covered store and asked them for some.

They said all they had was neon (Ne) and mercury (Hg), that wouldn't do so I went to the toxic waste dump and rolled in some uranium (u).

Having put nobelium (No) thought into it I also rolled in some polonium (Po). Combined they gave me a silver(Ag) glow.

Argon (Ar) ! My costume was the best better than that Indium (In) kid dressed in platinum (Pt).

As I was breathing my oxygen (O), I suddenly didn't feel so well.

Suddenly I turned into a krypton (Kr) kid.

I felt like Superman. It was totally osmium (os). I felt like I could crush iron (Fe)!

But I couldn't because I died of radiation.
