My new Porsche

One day I was driving along in my (Hg) Mercury, when I notice my (Gd) gadolinium was almost gone. So I stopped in at Esso and filled her up with the (Ti) Titanium octane gas, the expensive one.

Once I got home, I was thinking to myself, I need a new car. So I headed to the dealer. I told him I was looking for a good (Eu) Europium car that I could really drive fast with, and drive it down to the (Cf) Californium Coast. I wanted either a (Ag) silver or a red car. I saw this red Porsche and it (Ta) Tantalum-ed me. It was beautiful. It had a nice (Cr) Chromium finish to it . I had to get it, so I signed the papers, and he gave me the car.

I finally had the car of my dreams, the engine was so (Sr) Strontium, it had good safety to (Pa) protactinium me. It was such a good car it should be nominated for a (No) Nobelium prize.

So I brought my new Porsche 911 (Pt) Platinum edition to the Auto Body Shop and they put on a bunch of cool parts. They put on (Ne) Neon lights they put on a Nitrous Oxide injector.

My new car was so fast, I wish I could drive in on the highways in (Ge) Germanium so there was no speed limit!

But (Cf) Californium would have to do, I cant wait to take it down there this (Sm) samarium, I'm going to look pretty (Ra) radium in my new Red Porsche, I'll never be (B) boron while driving again, even if I'm just goin to pick up some (Mn) Manganese food for supper.

Well I 'm gonna go rip up the (Rh) rhodium in my new car, so I guess I'll see you later.
